

NEW RAISE/LOWER UNITS Floor Wall Mounted

**RIGAL BENNETT
fixed raise/lower units
are used with a number
of mobile tanks to enable
one mixer to mix
several tanks**

- Cranes must be selected to lift correct weight and have the ability to lift stirrer and shaft over top lip of vessel, then lower mixer to correct mixing position.
- Mobile cranes have forward protruding legs which need to pass under or round tanks, IBC or drums.
- Standard cranes are fabricated from painted mild steel but special stainless steel ones can be made.
- If forward leg gets in the way, modification can be made.
- Choice of lifting units include hand/hydraulic, air, electric or hand winch.

Table below shows standard range but specials are available on request.

TYPE	OPERATED BY	CAPACITY KG	MOUNTED	STANDARD LIFT HEIGHT MM	HEIGHT OVERALL	STANDARD REACH
FT30H-63	HAND/HYD	300	WALL	1200	3135	500
